

Lily & the H3llions are a four piece rock band with three vocals.

Ideally, a venue will provide a full P.A. system with public address speakers, microphones, monitors and a powered mixer. We can provide these things for an additional fee.

Electric power supply is required for both amplifiers and drums.

Lily takes center stage, with the drums at the rear of center stage, with guitar and bass amps to the left and right.

Microphones on stands are required forward stage left, center and right.

Being a band that encourages dancing, and leads by example, we love to have as much room on stage as possible open for each performance.
